- Experience in different phases of Software development life cycle including project design, development, Testing and implementation.

Work Experience
⊕May:2014-Present ☞ F3 Technologies

*Job Title:*Software Engineer
Job Responsibilities:
- Development of the given tasks within given timeline.
- Basic Documentation of Developed Products.
- Testing of the developed unit and project.
- Database Designing.

⊕Jan:2012-May:2014 ☞ Utrade.co

*Job Title:*Software Engineer
Job Responsibilities:
- Development of the given tasks within given timeline.
- Basic Documentation of Developed Products.
- Testing of the developed unit and project.
- Database Designing.

⊕Jan:2011-Dec:2011 ☞HIQU Technologies

*Job Title:*Software Engineer
Job Responsibilities:
- Development of the given tasks within given timeline.
- Basic Documentation of Developed Products.
- Testing of the developed unit and project.
- Database Designing, development & modification.
- Crystal reporting.

⊕Nov:2008-Dec:2010 ☞Cyber DesignZ

*Job Title:*Software Engineer
Job Responsibilities:
- Development of the given tasks within given timeline.
- Basic Documentation of Developed Products.
- Testing of the developed unit and project.
- Database Designing.

⊕Sep:2008-Nov:2008☞ Triple-I International

*Job Title:*Software Engineer
Job Responsibilities:

- Development of the given tasks within given timeline.
- Basic Documentation of Developed Products.
- Testing of the developed unit and project.

Professional Experience:

✎JCCI (Jedha chamber of commerce and industry):

System Function:Its companyinternal system management web application, having admin, super admin with role like chamber company and there departments. They can manage their letters and respective stickers and papers.
My Working Areas: I worked on paper & sticker management module, and Ticketing module.
Technologies / Programming Languages: C-Sharp (Asp.Net) 2010, SQL Server 2008, JSON, Ajax,JavaScript, MVC3 (linq-to-sql).

✎NIJAH:

System Function:This is an employee recruitment web site. Employees and their profile management.Job listing, Companies profile and Jobs management.
My Working Areas: I worked on Job posting, listing, and employer and employee backend development modules.
Technologies / Programming Languages C-Sharp (Asp.Net) 2010, SQL Server 2008 and Enterprise Library, JSON , Ajax, JavaScript , MVC3 (Razor).

✎Lenzo Arabia:

System Function:This game management project, we have some embed flash games, quizzes and physical games.Saudi Champion Club: is a dedicated club for our targeted kids to give them an opportunity to be part of endless activities that involve their bodies & minds through (malls & online) missions.
My Working Areas: I worked as lead on this project, develop the whole backend. Embedded magneticstrip reader for player login, and player magnetic identity card printing module.
Technologies / Programming Languages C-Sharp (Asp.Net) 2010, SQL Server 2008 and EnterpriseLibrary, JSON , Ajax, JavaScript , MVC3 (Razor).

✎eSM-Development:

System Function:This application is used as a financial ERP. It is built on the concept of Cost

Accounting and is used by different clients for keeping track of their Revenues and expenditures. It also has the ability to integrate with Microsoft Great Plains and Crystal Reports.

My Working Areas: I worked on crystal report 10 , database management, database modifications.

*Technologies / Programming Language*s Crystal report 10, SQL Server 2008.

✑Sonna Textile Inventory Management:

System Function:This is basically ecommerce web site, provides customer to manage their inventory. This site Visitors can add products to their shopping cart from different categories and can make payment online via PayPal payment gateway. This application has ability to synchronize periodically with QuickBooks and support and banner management.

My Working Areas: I gathered the requirements, designed the database and implement Category, Product and Stock management area.

*Technologies / Programming Language*s: C-Sharp (Asp.Net) 2008, SQL Server 2005 and EnterpriseLibrary.

✑Inspection Companion:

System Function:This application is used to help Home Inspection Companies in tracking theircustomers, jobs, observations, inspection tests, invoice and estimates.Along with that live help is also provided.

My Working Areas: I gathered the requirements, designed and developed the database and implement it. Iworked on different areas.

*Technologies / Programming Language*s: C-Sharp (Asp.Net) 2008, SQL Server 2005 and Enterprise Library.

✑Pain Clinic:

System Function:A web application for a clinic where patients come for check-up. Patients are sent to doctor's queue. After check-up and prescription from doctor, patient is sent to checkout person's queue where follow up date and time is assigned to patient. Patient can also buy medicines.

My Working Areas: I gathered the requirements, designed and develop the database and implement it .I worked on different areas.

*Technologies / Programming Language*s: C-Sharp (Asp.Net) 2008, SQL Server 2005 and Enterprise Library.

✑CH Hudson Loan System project:

System Function:The proposed System will be able to provide an interface, where the user can add new clients, salesman, and administrator and track the information regarding loans.

The users (admin) can easily extract desired information regarding its clients, their loans (amount and state), processing status (i.e. opened, reviewed etc.).
The key intention, which would be achieved, is the efficiency and accuracy by the help of providing smooth processes and accurate Information.
My Working Areas: I gathered the requirements, designed and develop the database and implementit. I worked on different areas.
*Technologies / Programming Language*s: C-Sharp, VB (Asp.Net) 2008, SQL Server 2005 andEnterprise Library.

✏QRMS(Quran Reading Management System):

System Function:Quran Reading Management System is a web application which manages record of students, tutors, CSR and their online classes and attendance. Schedule for classes are assigned to tutors, leads and students through this system.
My Working Areas: I gathered the requirements, designed and develop the database and implement, I worked on different areas.
*Technologies / Programming Language*s: C-Sharp (Asp.Net) 2008, SQL Server 2005 and Enterprise Library.

✏PMS(Project Management System):

System Function:Project Management System is a web application which manages a record ofteam members and team leads daily tasks. New projects are added as well as previous projects can be updated. Task reports are generated through this system and payment record of each project is also maintained.
My Working Areas: I gathered the requirements, designed and develop the database and implement,   I worked on different areas.
*Technologies / Programming Language*s: C-Sharp (Asp.Net) 2008, SQL Server 2005 and Enterprise Library.

✏CDZ(cyber designZ):

System Function: http://www.cyberdesignz.com
My Working Areas: I design its CMS , develop its database , and worked on it front end.
*Technologies / Programming Language*s: PHP, MySQL , WAMP Server.

Qualification:

✏Riphah International University Islamabad.
Bachelor of Software Engineering. (2003-2007)
CGPA 3.42
✏Polytechnic Institute For Women Islamabad
Diploma Associate Engineering (3 Years Equivalent FSC) (2000-2003)
1st div

✒Punjab Board of Intermediate and Secondary Education
Science Subjects.

Certifications / Awards:

- Year Best Developer Award Cyber DesignZ.
- "Certified Computer Network Administrator "CCNA From "ARID Agriculture University, Rawalpindi",Sponsored by NAVTECH and CISCO.
